Research Intern

Advisor: **Prof. Venkatesh Raman**

January 2023 – June 2023

The Institute of Mathematical Sciences, Chennai, India

- Topic:** Monitoring edge-geodetic sets in graphs - algorithms and complexity - Worked on some algorithmic questions surrounding a topic titled "Monitoring edge-geodetic sets in graphs" with an emphasis of the complexity of the parameter in some special graph classes and obtained partial results.
- Audited two courses, Parameterized complexity and Approximation Algorithms through the duration of the internship.

MITACS Globalink Research Intern

Advisors: **Prof. Danny Dyer and Prof. Andrea Burgess**

June 2022 – August 2022

Memorial University of Newfoundland, St. John's, Canada

- Topic:** The Deduction number of graphs and subgraphs - a recent cops and robber variant derived from the zero-visibility model of the cops and robber game on graphs. The structural aspects and bounds were studied particularly on some graph products.

Research Intern

Advisors: **Prof. Florent Foucaud and Prof. Lekshmi R S**

April 2021 – November 2021

Université Clermont Auvergne, Clermont-Ferrand, France

- Topic:** Monitoring edge-geodetic sets in graphs - A graph-theoretic concept in the area of network monitoring was introduced where one wishes to monitor the vertices and/or the edges of a network (viewed as a graph) in order to detect and prevent failures. Inspired by two notions studied in the literature (edge-geodetic sets and distance-edge-monitoring sets).

- Curriculum development and analysis using graph-theoretic ideas.

Student Intern

May 2019 – May 2019

- Web Application Development for the Intellectual Property Rights and Knowledge Management Group at C-DOT, Bangalore
